Project: Freelance Application Manager (m/f/d), SAP WM/MM

Client: A leading german technology group providing products and solutions for the global automotive and security segments.

Location: Remote

Start: As soon as possible

Duration: 6-12 months

Occupancy: 4-5 days a week

We are looking for a Freelance Application Manager (m/f/d), specializing in SAP WM (Warehouse Management) and MM (Material Management) modules. This role involves supporting and customizing SAP WM and MM modules, providing second-level support in incident and change management, and acting as the main point of contact for key users.

FREELANCE APPLICATION MANAGER (M/F/D), SAP WM/MM

EINSATZORT: REMOTE

REFERENZNUMMER: A0WOJ0000005TYXIAY

Key Responsibilities:

- Provide module support and customization, primarily for SAP WM and MM modules.
- Engage actively in 2nd level support for incident and change management.

Qualifications:

- Several years of professional experience in application management.
- Proficiency in managing external service providers and coordinating with internal teams.

- Coordinate and manage ticket dispatching within incident and change management processes.
- Oversee external IT service providers, ensuring smooth operations and project execution.
- Advise and support business partners in process-related improvements, new development, and redesign of business processes, particularly in logistics and warehouse management.
- Collaborate in the creation of technical solution concepts and the realignment of existing logistics-focused applications.
- Assist in the implementation and testing of new software components and developments.
- Extensive knowledge of operation and user support for logistics-related applications, both SAP and non-SAP.
- Deep understanding of business processes in warehouse and inventory management and related logistics processes.
- Proficient in SAP WM and MM modules, including customizing, debugging, and ideally programming.
- Familiarity with business process modeling, IT project management, and ITIL frameworks.
- Fluent English and German
